

# GDPR Compliance & Data Security

A roadmap to GDPR Compliance for your non-profit organisation

## What is GDPR?

The General Data Protection Regulation (GDPR) intends to protect the data of European Union citizen and covers all personal data relating to an identifiable natural person, such as names, addresses, bank records, insurance, online behaviour, etc. As of May 25th, 2018, **compliance is mandatory for all organisations handling such data.**

### Ensure your organisation's GDPR compliance to:

- Protect the personal data of your staff & external parties
- Improve the quality of internal information management
- Increase secure data management practices
- Promote an image of reliability
- Avoid hefty fines

## How can D4D help you with becoming GDPR-compliant?

D4D offers GDPR support which provides legal, administrative, and technical coverage, giving you control of your data storage and data management in line with the GDPR compliance, while resulting in internal awareness on data management and efficiency in your work processes.

### 1. In-depth data inventory

Based on the baseline scan\*, we build a data processing register by analysing which data is secured, which applications and ways of working are affected, handling of EU vs. non-EU-based data, etc., indicating risks and points of improvement.

### 2. Implementing the action plan

We support with implementation measures (e.g. technical security, system design, internal processes, and policy design) based on the agreed scope.

### 3. Monitoring and aftercare

We help you with embedding and developing internal capacity for monitoring GDPR-related issues, such as appointing a Data Protection Officer.

#### \*Prerequisite: Digital Health Scan

A baseline scan to understand the current situation and clarify the scope of GDPR within the organisation (separate offer).

## Who is it for?

Those responsible for information technology and digital security:

- Operations Directors
- Finance Directors
- Chief Information Officers
- IT Coordinators
- Data Protection Officers

## What does it cost?

€ 8.500 - €11.500\*

\*Budget range is excl. VAT and depends on organisation size, complexity, etc. The Digital Health Scan is used to determine the scope.

## Why Data4Development?

D4D bridges the gap between non-profit organisations and technology. We advocate for the power of technology for good, finding the best digital solutions to tackle each organisation's needs. Our expertise lies in aligning organisations' IT landscapes with their internal processes, aided by our extensive market knowledge of IT applications for project management, finance, CRM, data visualisation, and more.

## Our track record

**terre des hommes**  
stops child exploitation

Support to move towards a solid IT landscape aligned with new strategic goals, including a check on compliance and data security.

**Protestantse Kerk**

A full GDPR implementation of a large customer database, including setting up new data security processes, mapping data management risks and ensuring compliance.

## Transformation: The Bigger Story

How else can D4D do to help you with your digital transformation?
